EDUCATION

Stony Brook University

B.S. in Computer Science & Business Management

Stony Brook, NY

Expected May 2028

Dean's List | Computer Science Honors Department | Stony Brook University Global Excellence Scholarship Recipient

Relevant Coursework: Object-Oriented Programming, Software Development, Data Structures & Algorithms, Operations Management, Business Decisions, Marketing, Entrepreneurship, Organizational Behavior

PROFESSIONAL EXPERIENCE

IT Specialist

July 2025 - Present

Division of Information Technology, Stony Brook University

Stony Brook, NY

- Serve as a primary point of contact for 100+ faculty and students weekly, identifying user needs and coordinating solutions while maintaining a 97% satisfaction rate.
- Manage 200+ client requests through TeamDynamix, prioritizing issues, communicating updates, and coordinating with technical teams through resolution.
- Partner with university teams to identify accessibility and usability issues, contributing to a 15% increase in positive UX feedback.

AI/ML Fellow

May 2025 - January 2026

KPMG

- Selected from 10,000+ applicants to participate in Cornell Tech's 12-month AI fellowship program aimed at advancing women and underrepresented groups in technology.
- Worked with mentors and industry partners to turn business problems into data-driven AI solutions.
- Presented monthly demos and recommendations to mentors and industry stakeholders, translating technical findings into clear business takeaways.

LEADERSHIP EXPERIENCE

Professional Development & Recruitment Chair

January 2026 - Present

Theta Tau Professional Engineering Fraternity - Zeta Epsilon Chapter

- Lead recruitment events from planning through execution, assigning responsibilities and managing logistics for 70–100+ attendees.
- Coordinate members and campus organizations to keep teams on schedule and handle issues during events.
- Build partnerships with student organizations to expand outreach and organize joint events.

Communications & Outreach Lead - Executive Board

April 2025 - May 2026

Women in Computer Science (WiCS) - ACM-W Chapter

- Managed WiCS social media and communication efforts, increasing engagement by 30% in one month.
- Worked with Stony Brook's Career Center and the executive board to share career opportunities and resources with 150+ members.
- Led outreach and media contacts, improving communication and cutting email response time by 40%.

PROJECTS

Food Rescue | TypeScript, React Native, Swift, Firebase, Claude Code

July 2026

- Built a two-sided platform that helps restaurants post surplus food and NGOs quickly find and claim donations.
- Designed separate user flows around the different needs of restaurants and NGOs for posting, browsing, and claiming donations.
- Tested core workflows with 20+ users, using feedback to identify double-booking issues and build a more reliable claiming system.

AI in Sustainability and Energy Optimization | Python, Pandas, Scikit-learn

January 2026

KPMG

- Worked on a 5-person team to evaluate ways companies could reduce AI energy use while maintaining productivity.
- Compared solutions using predictive models, identifying approaches with up to a 20% projected reduction in environmental impact.
- Presented recommendations to KPMG's sustainability team, explaining results, tradeoffs, and business impact.
